

My customer has a white pickled Mexican tile floor that is peeling and has asked if it can be re-pickled?

Pickled Mexican clay tiles are pickled at the factory. It is difficult to re-pickle the tile after it has been installed. This is a job for a professional, and it will be very expensive, since all the grout will have to be masked to keep the pickling paint from running into it.

TIP It is nearly impossible to re-pickle a Mexican tile in place, however it is possible to remove the pickling with strippers.
