How to Prevent Hard Water Spots in a Polished Granite Shower

A good quality application of silicon impregnator should do the trick. It may also be helpful to install a water treatment system to reduce the calcium in the water.

TIP If you squeegee and/or dry the shower wall immediately after a shower you will find the water spots are easier to remove or possibly won't occur at all.

For more information, register to earn a <u>Stone Restoration Master Course Certificate</u>. You'll learn how to restore natural stone floors, countertops, and walls, engineered stone, and granite floors, using the most efficient and effective restoration procedures. Also included in this program is the <u>Stain Care Pro</u> course with a one-year subscription to the Stain Care Pro app and <u>Understanding Sealers</u>.
